UX and UI Designer

Platforms: Adobe Photoshop, Sketch, Figma

UI: Website Mock-ups, App Mock-ups, Infographics, Stylesheets, Logos

- **UX:** Wireframing, Workflow Diagrams, Technical Specifications

Objective

Passionate and motivated Software Developer with experience in front-end and back-end technologies, seeking to contribute my skills and enthusiasm to a dynamic development team. Adept at problem-solving, coding, and collaborating in fast-paced environments. Eager to leverage hands-on experience with [specific technologies] and continue learning in a professional software development environment.

Projects

Personal Portfolio Website

- Created a responsive portfolio website using HTML, CSS, and JavaScript to showcase personal projects and technical skills
- Integrated with GitHub to display code repositories dynamically

Online Movie Booking System

- Built a full-stack web application for booking movie tickets with a front-end built in React and back-end using Node.js and Express.js
- Implemented MySQL for database management and connected APIs for movie data retrieval

Machine Learning Model for Sentiment Analysis

- Developed a sentiment analysis model using Python and Natural Language Processing (NLP) libraries like NLTK and Scikit-learn
- Deployed the model as a web application using Flask for easy user access and interaction

Additional Skills and Interests

- Open-source contributions and involvement in the coding community
- Exploring machine learning and AI technologies through self-driven projects
- Participating in coding challenges on platforms like LeetCode and Codeforces
- Developing personal projects and experimenting with new tech stacks (e.g., Rust, Kotlin, Docker)
- Playing and designing games, with a particular interest in Unity development
- Attending tech meetups and conferences to stay updated on industry trends

Certifications

- **Full Stack Web Development Certification** — Udemy, February, 2024
- **CyberSecurity** — ICS2 January 2024
